## OBJECTIVE

A frontend engineer experienced at using front-end technologies, passionate about writing code and building responsive UI's, seeking for a challenging and rewarding position as a frontend engineer, where I can utilize my skills to create engaging and user-friendly interfaces, and contribute to the success of a dynamic team.

## EXPERIENCE

- **ZURI X HNG9**

*October 2022 - November 2022*

Intern (remote)

- I built the account settings page, error404 page, the dashboard nav-bar (mobile view), of an app titled "CatchUp" using ReactJs and CSS. This app lets you schedule hangout with your friends, where you can unwind after a busy week. CatchUp platform solves that problem.

- I built the dashboard UI of a website called "Metabnb" using ReactJs and CSS. Metabnb is a rent place similar to Airbnb but in the metaverse.

- I built the UI of a website that is similar to linktree using ReactJs and CSS. The website shows profile links to various digital things on sale.

- **FREELANCE**

*February 2022 - October 2022*

Remote

- Built the landing page for an administrative website.

- Create engaging and interactive UIs with HTML, CSS, JavaScript, React.

- Troubleshooting, debugging and bug fixes

- Staying up-to-date with the latest frontend development techniques and technologies.

## PROJECTS

- **Password Generator**

I built a password generator using HTML, CSS, JAVASCRIPT. It generates strong 8 character random password and allows the user copy their password after it's been generated.

- **Food Recipe Blog**

I built a food recipe blog using HTML and CSS. You can read up a local chef's secret food recipes in the home page or subscribe for food recipes via email on the contact page.
